PROJECTS

Automated Customer Support System (04/2022 - Present)
- An automated customer support system is an application that is designed to assist customers with their issues of current devices.

News App (08/2022 - 08/2022)
- Link : https://adityaranjan858.github.io/news/
- This is based on React Js. In this news app, we can read latest news on the basis of category like Business, Sports, General, Science etc. (**Note : run only local**)

My Portfolio
- Link : https://adityaranjan858.github.io/portfolio/

TextUtils App (08/2022 - 08/2022)
- Link : https://adityaranjan858.github.io/TextUtils/
- This is also based on React Js. TextUtils transform text to as uppercase, captalize, inverse capitalize, copy text etc. Also, Be it word count, character count etc.

KRS Finivia (10/2021 - Present)
- Link : http://krsgroup.co **or** https://adityaranjan858.github.io/krs_finivia/
- I got the opportunity from a finance company based in Baddi, Himachal Pradesh to design his Website. The company has provided me with relevant information regarding their services and offerings. Using this information, I have designed a website that meets the company's requirements and effectively communicates their message to potential clients.
- Working from scratch using Html, CSS, Bootstrap, JS & jQuery.

Business Shift (09/2021 - Present)
- Link : https://app.7shifts.com/
- This is a "React" based project and I am working on UI design & making it responsive
- Appreciated by client for well designed in mobile view

Forest Garden (08/2021 - Present)
- Link : https://www.forestgarden.info/
- This project is switched to Joomla Technology from Laravel
- I have added 8+ new pages & maintained UI/UX design issues
